

讨论班作业-IHT

Evaluate the performance of IHT algorithm when the signal-noise rate decreases as 10, 5, 1, 0.5, 0.1.

case1: SNR=10

case2: SNR=5

case3: SNR=1

case4: SNR=0.5

case5: SNR=0.1

conclusion

When the signal-noise rate decrease, the performance of IHT algorithm get worse.
